

Total mass  $m = 9,66 \text{ kg}$ .

Width  $w = 25,5 \text{ cm}$ .

mean depth  $\underline{d} = \frac{d_g + d_b}{2} = 7,75 \text{ cm}$ .

Area  $A_{\text{front}} = \underline{d} \cdot w = 0,0178 \text{ m}^2$

Area  $A_{\text{side}} = \underline{d} \cdot l = 0,0840 \text{ m}^2$
